

Andrew Fukuda , The Hunt

Imagine you live in a world where humans are hunted and eaten by monsters and you have to try and run escape just to live your life, this is what The Hunt is about. Usually I don't read this type of genre book but the dramatic feeling I got while reading this book made me want to continue reading. This book is about a late teen boy who was A human in a vicious human hunting world. Well The Hunt by Andrew Fukuda is not a scary but a very brutal book about a boy who must hide that he's human in a world ruled by vicious, vampire like creatures called hunters. The boy living when he was chosen to join a deadly hunt and he has to protect his identity while trying to survive. The book kinda jumps right into action as soon as you start it, with an intense feeling right off the bat. That's what made me get hooked to the book as soon as I started reading it, During the book the boy has to pretend he's a vampire like creature and not a human in order to stay alive. While pretending he gets picked for the hunt and everything becomes even more dangerous,

The boy's name is Gene and now that he got picked for a huge event where the creatures chase and eat actual humans for entertainment There's a problem since he's pretending to be one of them aka the Vampire like creatures, Gene has to join the Hunt even though he is the type of person they're trying to kill. Gene gets taken to the Heper institute where the hepers being hunted are kept. While he's there, he starts to learn the truth about them and forms connections with some of them. Meanwhile he struggles every second to hide his human traits, sweating, laughing, blinking and smelling different than them. He also gets close to a girl named Ashley, a girl from his school who was also chosen for the Hunt. She seems suspicious but also seems to like Gene.

As the Hunt gets closer, Gene discovers secrets about his father, the government and the real purpose behind the Hunt. When the event finally begins, everything turns into chaos, Gene fights to survive and with help he barely escapes the creatures. The book ends but you can continue on the second book. This is what The Hunt by Andrew Fukuda is about and this story may look a little long but while you're reading the book is gonna be over very quickly and is gonna keep you wanting to read more and wondering what's gonna happen next.
